

Preparation for Spider Treatment

To effectively treat for spiders the following items should be completed before treatment.

1. Clear all items from under beds.
2. Linen closets should be emptied.
3. Remove all items from around hot water tank and heat & air unit.
4. Pull drawers out of dressers and place them on the bed.
5. Pull furniture 4 to 6 inches away from walls.
6. Remove all pets, cover fish tanks & unplug air supply.
